

FREE MAHMOUD KHALIL!

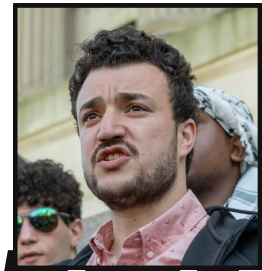

PROTESTING GENOCIDE IS NOT A CRIME!

Mahmoud Khalil is a student activist who is sitting in prison right now simply for exercising his right to free speech. Mahmoud was part of protests at Columbia University in New York that demanded an end to Israel's genocide against Palestinians. Mahmoud never broke the law, he didn't commit any act of violence, and he never advocated violence. But because he exercised his basic right under the First Amendment, ICE agents kidnapped him, put him on a plane to Louisiana, and denied him contact with his lawyers.

Trump has long threatened to deport people with student visas who participated in pro-Palestine protests. That would be completely illegal and unjust, but this attack is even more extreme – Mahmoud is a permanent resident of the United States, and his wife is a U.S. citizen who is eight months pregnant.

We cannot allow this to become normal – we need to fight back until Mahmoud is freed!

Huge numbers of people all across the United States have taken to the streets in the last year and a half to express our outrage that our tax dollars are being used to massacre tens of thousands of innocent people. This people's movement terrifies the politicians and the war makers, and they want to shut down dissent.

If Trump can get away with this massive violation of Mahmoud's rights, then who's next? Will he decide that union organizers speaking out against corporate greed are criminals? Will he say that people protesting to save the environment are terrorists? This is the decisive moment when we need to take a stand before it's too late.

If you value your right to disagree with the government and protest the unjust actions of politicians, then Mahmoud's fight is your fight.
